

Badoit Sparkling Natural Mineral Water – Annual Water Quality Report

At Badoit we are proud of the quality of our products. Badoit Sparkling Natural Mineral Water meets or exceeds all bottled water standards for quality and safety at the Federal and state level. The US Food and Drug Administration (FDA) regulates bottled water as a food. Our scientists and independent certified laboratories perform extensive tests on the water source and finished bottled water product to ensure we exceed or are compliant with all Federal and state bottled water requirements.

In addition to existing stringent regulatory standards, the International Bottled Water Association (IBWA) maintains a strict Model Code of quality for its members. Badoit is a member of IBWA and meets or exceeds the quality requirements of the IBWA's Model Code. Additionally, we take pride in the fact that our bottled water production plant is annually inspected, on an unannounced basis, by an independent testing organization, NSF International (NSF). Based on unannounced annual plant inspections and product testing, NSF certifies that Badoit Sparkling Natural Mineral Water complies with federal and state bottled water regulations and IBWA's Model Code. NSF is located in Ann Arbor, Michigan. For more information about IBWA and NSF, please visit their websites at <http://www.bottledwater.org> and <http://www.nsf.org> or call IBWA at 1-800-WATER-11 and NSF at 1-800-673-6275.

Badoit Sparkling Natural Mineral Water Source

Badoit Sparkling Natural Mineral Water comes from the St. Galmier Spring located in the Plaine du Forez region, a remarkably flat valley bounded by mountains in southeastern France. Badoit Sparkling Natural Mineral Water is naturally filtered as it slowly trickles down through layers granite bedrock. As the water filters through the granite aquifer, it absorbs natural minerals. The carbon dioxide in Badoit Sparkling Natural Mineral Water is

harvested from the aquifer from which the water is collected.

Badoit Sparkling Natural Mineral Water Bottling

Badoit Sparkling Natural Mineral Water is bottled exclusively at its protected source – the St. Galmier Spring. Badoit's source is approved by several regulatory agencies based on a detailed and extensive review. To ensure the purity and consistency of Badoit, automated bottling equipment is maintained under strict sanitary conditions and a quality control laboratory conducts several hundred quality tests daily, both at the water source and finished bottled water product.

Badoit Sparkling Natural Mineral Water Additional Safety Measures

Badoit Sparkling Natural Mineral Water is subjected to a Greensand Filtration during which manganese coated sands reduce certain naturally present minerals from source water.

Water Quality Data

Attached is a copy of our most recent extensive water quality testing conducted by the independent certified laboratory, NSF. The NSF Report lists the water quality test results for over 175 substances including inorganics (metals, minerals, etc.), organics (pesticides, herbicides, etc.) and microbials as well as physical parameters. Badoit Sparkling Natural Mineral Water is analyzed for both regulated and unregulated substances. This Report contains the substance analyzed, approved test method used, test result, minimum detection limit, measurement unit, date analyzed and FDA Quality Standard for bottled water, if applicable. The FDA Quality Standards are the maximum allowable levels for over 80 substances in bottled water.

Badoit Sparkling Natural Mineral Water is in full compliance with all applicable federal, state and industry bottled water standards.

For more information about Badoit Sparkling Natural Mineral Water, call 1-800-443-3553 or write to us at Badoit Consumer Care, PO Box 1625, Horsham, PA 119044

Report Date 05-FEB-2015

Customer Name Danone Waters of America, Inc.
Tested To USFDA CFR Title 21 Part 165.110
Description Badoit Vert Sparkling Natural Mineral Water | Badoit Vert Sparkling Natural Mineral Water
Test Type Annual Collection
Job Number A-00165610
Project Number 9993058 (CLAA)
Project Manager Carla Silva Santos Marques

Thank you for having your product tested by NSF International.

Please contact your Project Manager if you have any questions or concerns pertaining to this report.

Report Authorization *Kerri L. LeVanseler*
Kerri LeVanseler - Director, Chemistry Laboratory

Date 05-FEB-2015

**General Information**

Standard: USFDA CFR Title 21 Part 165.110
 Lot Number: 009, 012, 014
 Product Description: Badoit Vert Sparkling Natural Mineral Water
 Trade Name: Badoit Vert Sparkling Natural Mineral Water

Sample Id: **S-0001119329**

Test descriptions preceded by an asterisk "*" indicate that testing has been performed per NSF International requirements but is not within its scope of accreditation.

The reported result for Odor, Phenolics, Potassium, Specific Conductance and Total Residual Chlorine cannot be used for compliance purposes within the State of Arizona.

Notes:

- 1) Bottled water sold in the United States shall not contain Fluoride in excess of the levels published by the USFDA in 21 CFR Part 165.110. These levels are based on the annual average of maximum daily air temperatures at the location where the bottled water is sold at retail. Please refer to the most current edition of the regulation to determine the Fluoride maximum level that pertains to your product.
- 2) A blank on the FDA SOQ column indicates that no maximum level has been established by the FDA for that contaminant.
- 3) An ND result means that the contaminant was not detected at or above the reporting limit.
- 4) Product not evaluated for Total Dissolved Solids against the minimum FDA SOQ for the labeling of the product as Natural Mineral Water. Company is responsible for compliance with applicable regulatory requirements applicable to conducting commerce.

For a list of NSF International Method Detection Limits refer to http://www.nsf.org/media/eneews/documents/minimum_detection_level_spreadsheet.pdf.
